Summary of fund objective

The objective of the Fund is to achieve long-term capital growth. The Fund intends to achieve its objective by investing primarily in a concentrated portfolio of global equities issued by companies that, in the view of the Investment Manager, are geared towards the growth of the Metaverse, which is underpinned by developments in Artificial Intelligence and thus help facilitate, create, or benefit from, immersive virtual worlds for both consumers and enterprises. For the full objectives and investment policy please consult the current prospectus. **Name changed from Invesco Metaverse Fund on 18 January 2024. The fund objective also changed.**

Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Fund Strategy

The fund seeks to invest in undervalued companies that help facilitate, create or benefit from the metaverse - a network of highly immersive virtual worlds for both consumers and enterprises. The fund managers take a fundamental approach to stock selection, with a focus on cash flow, balance sheet strength and business model sustainability. It will typically hold 30 to 50 stocks, diversified across the metaverse value chain.

Past performance does not predict future returns. Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.
