

Capturing opportunities in Asia

Invesco Asian Equity Fund

As at end August 2024

Henley-based

Asian & EM Equities Team

This marketing communication is for professional investors and qualified clients/sophisticated investors only. Investors should read the legal documents prior to investing.

Investment risks

For complete information on risks, refer to the legal documents.

The value of investments and any income will fluctuate (this may partly be the result of exchange-rate fluctuations) and investors may not get back the full amount invested.

Invesco Asian Equity Fund:

As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund.

The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund.

Strategies:

As a large portion of the strategies is invested in less developed countries, you should be prepared to accept significantly large fluctuations in value.

The strategies may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of a portfolio. The Manager, however, will ensure that the use of derivatives does not materially alter the overall risk profile of the strategies.

Investment in certain securities listed in China can involve significant regulatory constraints that may affect liquidity and/or investment performance.

Note: The investment concerns the acquisition of units in an actively managed fund and not in a given underlying asset.

Invesco Asian Equity Fund

Track record since 1998

Invesco Asian Equity Fund versus benchmark (gross performance). Past performance does not predict future returns.

Source: Invesco as at 31 August 2024. Fund performance figures are shown in USD, inclusive of reinvested income, gross of ongoing charges and net of portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. Benchmark figures are total return, in USD. The benchmark index for the fund was MSCI AC Far East ex Japan until 31/03/04, at which point it changed to the MSCI AC Asia ex Japan Index. 28 February 1998 = 100. Please see Net Performance slide for the impact of ongoing charges. Returns may increase or decrease as a result of currency fluctuations.

Process & philosophy

Our investment target and principles

Active, fundamental approach

Overview

- Portfolio of around 60 companies in Asia ex Japan well diversified across markets and sectors
- Targeting double digit annualised returns from each investment to significantly outperform the market*

Contrarian

We look for bottom-up ideas in unloved parts of the market

Valuation-driven

We aim to buy companies for significantly less than our estimate of 'fair value'

Long term

3-5 year time horizon

Balance sheet strength

We favour conservative balance sheets

*Please note there is no guarantee this performance target will be achieved.

Overview of our investment philosophy

The typical investment lifecycle

Source: Invesco. For illustrative purposes only. *>10% CAGR is considered to be attractive over a 3-5-year period as it is well above the mid-single digit CAGR returns (~5-7%) historically delivered by the market as a whole – and a return expectation at the stock level which we would consider to be 'fair value'.

Process in action

Investment approach

Estimating the three components of total return for each company

We target a double digit annualised total return from each stock we buy¹

Source: Invesco. For illustrative purposes only.

¹Please note there is no guarantee this performance target will be achieved.

Investment approach

Fundamental analysis

Our company shortlist: \sim 100 stocks

3 components of total return

Company	EPS growth	Current P/E	Fair P/E	P/E re-rating	Dividends	Total return
	3y CAGR* (estimate)			in 3 years (estimate)		
Stock A	-2%	5x	8x	17%	5%	+20%
Stock B	8%	11x	12x	3%	4%	+15%
Stock C	20%	25x	20x	-7%	1%	+14%
Stock Y	12%	20x	16x	-7%	2%	+7%
Stock Z	0%	8x	8x	0%	3%	+3%

Stocks are ranked by our estimated total annual return for the next 3 years

Source: Invesco. For illustrative purposes only. This table is an illustration and simplification of our proprietary stock comparison tool with earnings-per-share, earnings-based fair valuation ratio (P/E), and dividend yield estimates as inputs to derive a total return expectation for each stock. A more complete version of the stock comparison table, particularly for financial companies, would include return-on-equity estimates and asset-based valuation ratios such as the price-to-book ratio as inputs. *CAGR: cumulative annual growth rate.

Investment approach

Portfolio construction

Considerations that shape the portfolio: Fund manager is the ultimate decision maker

Stock-level considerations

- Expected return
- Conviction
- Liquidity
- Downside support
- ESG considerations

Portfolio diversification

- High conviction portfolio with approx. 60 stocks
- Well diversified across sectors, countries and themes
- Typically countries and sectors +/-5% or between 0.5x and 1.5x of benchmark weights
- Max. active weight at stock level typically 4%

Risk oversight

- CIO challenge process
- Henley Investment Oversight team
- Independent Investment Risk team
- Internal audit and compliance
- Global ESG team oversight

Source: Invesco. For illustrative purposes only.

How ESG is integrated into our process

Objective

- We seek to **quantify the impact** of material ESG factors **on our estimate of a company's fair value**
- We actively **engage with company management** on ESG issues **to help enhance the value of our investment**

Resources

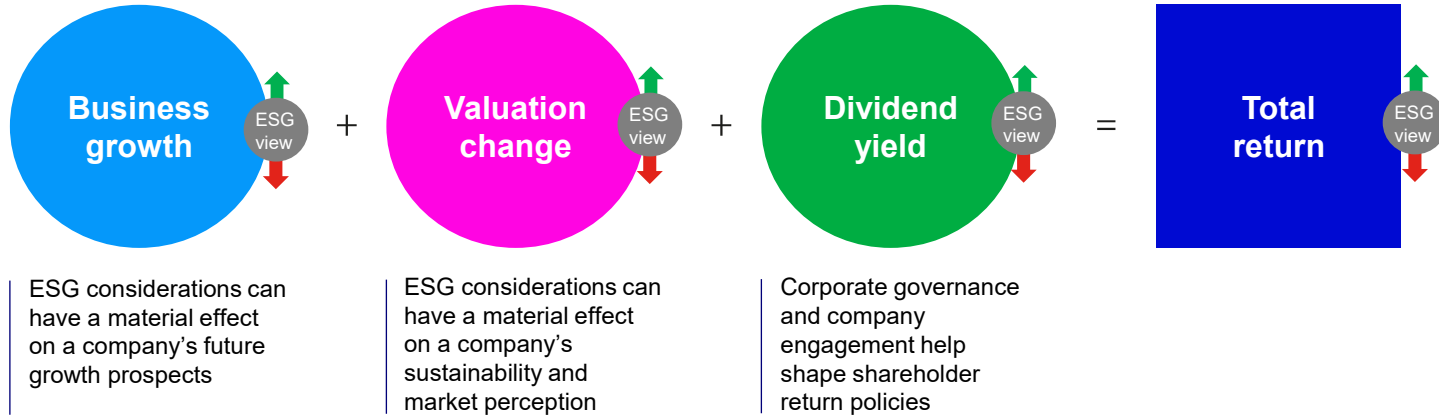

- All analysts and fund managers **integrate ESG into their stock analysis**
- Invesco **dedicated ESG team** and proprietary **ESG rating platform (ESGintel)**

In practice, ESG considerations :

- **Affect our estimates** of business growth, fair valuation multiple, and dividends
- **Affect the position size** of a stock

Source: Invesco. Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to www.invesco-management-company.lu

How ESG is integrated into our bottom up estimates

ESG factors are embedded into our return estimates

Source: Invesco. For illustrative purposes only. Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to www.invescomanagementcompany.lu

Company engagement and voting

Period	Company Meetings*	Total ESG Engagements*	Combination of E, S, or G	E	S	G	% of meetings where ESG was discussed
FY 2023	793	565	163	83	43	276	71%
FY 2022	763	530	154	107	33	236	69%
FY 2021	718	534	197	114	51	172	74%
FY 2020	708	520	187	55	94	184	73%

ESG engagements take two forms:

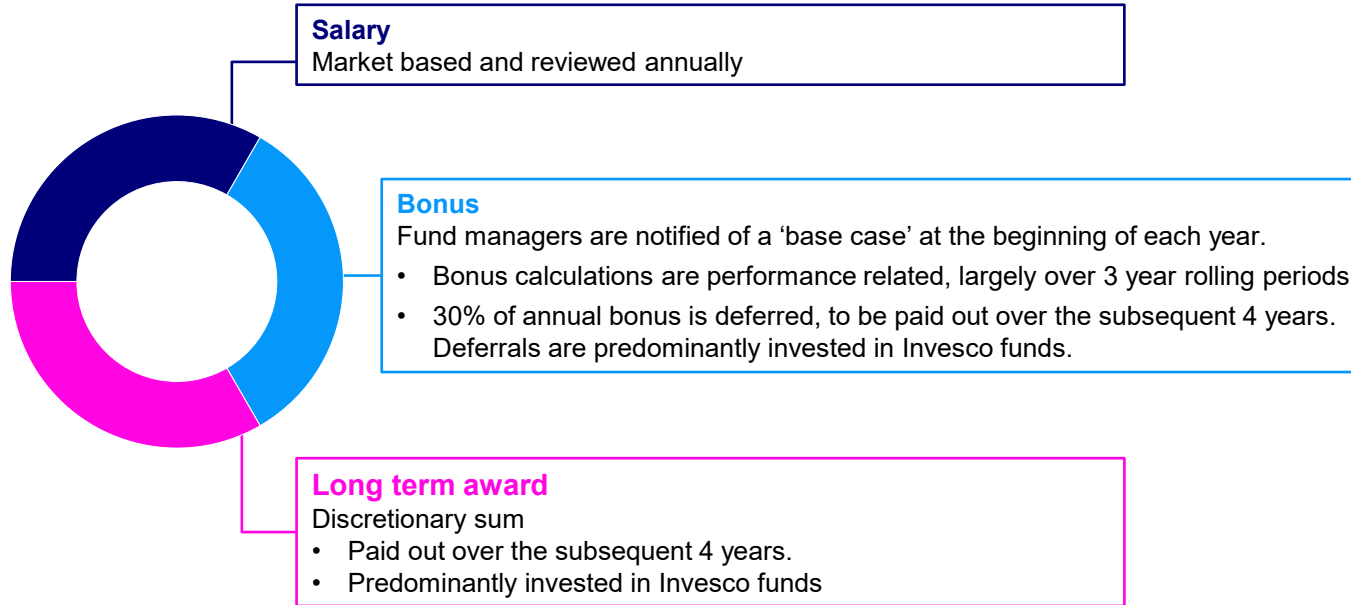

- Meetings dedicated to ESG
- ESG discussions within a wider meeting

In 2023, there were 279 ballots cast: 35% of our votes were contrary to management recommendations and 25% were against ISS recommendations.

Source: Invesco, as at 31 December 2023. *Total company meetings, ESG engagements, and votes across the Henley-based Asia & EM Equities team capabilities. Any investment decision should take into account all the characteristics of the fund as described in the legal documents. Invesco Asian Equity Fund

Key fund characteristics vs benchmark

Source: Style Analytics, Invesco as at 30 June 2024. Snapshot range: Last 5 years to June 2024. The chart shows how the Invesco Asian Equity Fund is and has historically been positioned or “tilted” relative to the MSCI Asia ex Japan index. Style Analytics provide the following guidelines: any tilt between -0.5 and +0.5 is probably not significant, any tilt less than -0.5 or more than +0.5 indicate a tilt exists but many not be significant, and tilt less than -1 or more than +1 are significant and less than -2 or more than +2 are very significant. The comparative information shown here is to illustrate the fund manager’s active investment approach and provide broader market context.

Asian valuations: P/B

MSCI AC Asia ex Japan trailing price-to-book ratio

Source: LSEG as at 31 August 2024.

Asian starting valuation matters to subsequent returns

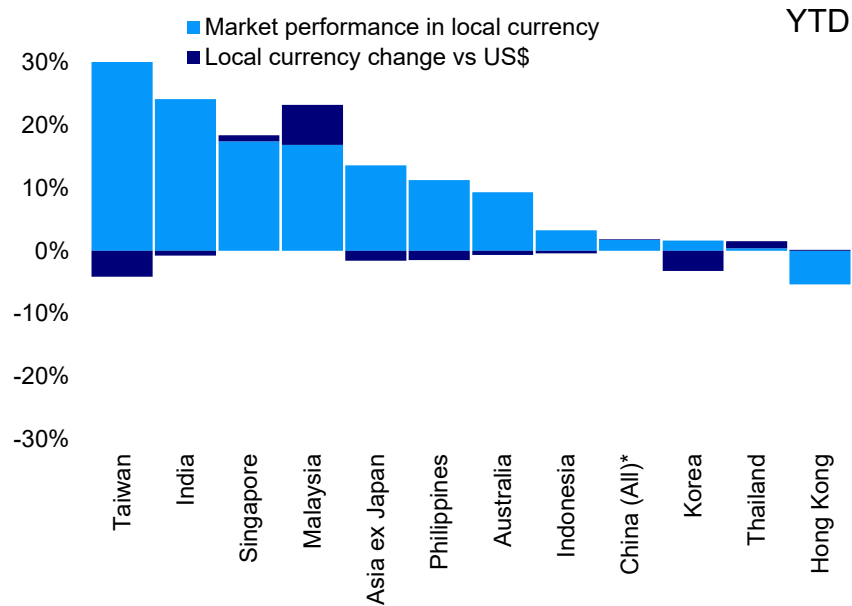

5-year Compound Annual Growth Rate returns for the Asia ex-Japan index at different starting Price to Book valuations

Source: Bloomberg, Invesco. Weekly returns and valuation levels of MSCI AC Asia ex Japan index from February 1995 to 31 August 2024. The chart divides into deciles the historic price-to-book valuation of the index and the subsequent average 5-year CAGR returns. Using these observations, we can infer that investing in the MSCI AC Asia ex-Japan index at an average valuation level of 1.6x book value (4th decile) has historically led to a 5-year CAGR return of 8.7% on average.

Taiwan Semiconductor Manufacturing (TSMC) (Taiwan)

The world's leading semiconductor foundry

Two key drivers of growth:

AI

- The rise of artificial intelligence leads to much higher demand for 'acceleration' of data centre servers
- TSMC makes virtually all the chips for AI acceleration

CPU

- Intel has historically dominated the PC CPU market, and Intel makes its own chips
- Most other chipmakers have now conceded that it is more efficient to outsource production to TSMC – Intel recently announced they are likely to follow
- The CPU addressable market for TSMC is as big as the smartphone addressable market

Asia ex Japan Equity Composite

Schedule of investment performance (2)

Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods 1st January 2003 through 31st December 2023. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. For purposes of compliance with Global Investment Performance Standards (GIPS®), "Invesco Worldwide" refers collectively to all direct or indirect subsidiaries of Invesco Ltd. that provide discretionary investment advice with the exception of the following entities: Invesco Investment Management Ltd., Invesco Investment Advisers LLC, Invesco Asset Management Australia (Holdings) Ltd., Invesco Global Real Estate Asia Pacific, Inc., IRE (Cayman) Ltd., Invesco Senior Secured Management, Inc., Invesco Private Capital, Inc., and Invesco Capital Management LLC. Invesco Great Wall Fund Management Company Limited is compliant with GIPS but is not part of Invesco Worldwide.
2. The Asia Ex Japan Equity Composite includes all discretionary fee paying portfolios. Portfolios in this composite aim to achieve above average total return through investment in companies in the Asia ex Japan equity markets. In pursuit of this objective the portfolios may take significant active positions relative to a recognised Asia ex Japan equity index.
3. The composite returns are benchmarked to the MSCI AC Asia ex Japan Gross Return Index (USD) from inception to 31 December 2000 and the MSCI AC Asia ex Japan Net Return Index (USD) thereafter. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. Investments made by the Firm for the portfolios it manages according to respective strategies may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark. Accordingly, investment results and volatility will differ from those of the benchmark.
4. Effective January 2023 the minimum asset level has been removed from the composite. Prior to this date it was USD 5 million
5. Gross-of-fee performance results are presented before management and custodial fees but after all trading commissions and withholding taxes on dividends, interest and capital gains, when applicable. Net-of-fee performance results are calculated by subtracting the highest fee of an active portfolio within the composite from the monthly gross-of-fee returns. The highest management fee of a portfolio included in the composite is 75bps. The institutional management fee schedule is as follows: Assets up to 100 mln GBP 60bps, Next 150 mln GBP 55bps, Next 250 mln GBP 50bps. (Or equivalent local currency)

Source: Invesco as at 14 August 2024.

Asia ex Japan Equity Composite

Schedule of investment performance (3)

6. Composite dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for the full year. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented where there is less than 36 months or fewer than three portfolios in the composite. All risk measures are calculated using gross of fee returns. The Firm consistently values all portfolios each month on a trade date basis. Accrual accounting is used for all interest and dividend income. Past performance is not an indication of future results. Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations is available upon request.
7. Valuations and portfolio total returns are computed and stated in U.K. Sterling. The Firm consistently values all portfolios each day on a trade date basis. Portfolio level returns are calculated as time-weighted total returns on daily basis. Accrual accounting is used for all interest and dividend income. Past performance is not an indication of future results. Foreign currency exchange rates for calculation of the composite and benchmark are based on the WM/Reuters Closing Spot Rates TM that are fixed at approximately 4:00 p.m. London time.
8. The composite creation date is May 2002.
9. The following are available on request: * Policies for valuing investments, calculating performance and preparing GIPS reports * List of composite descriptions * List of limited distribution pooled fund descriptions * List of broad distribution pooled funds
10. Net-of-fee performance was calculated using a flat fee of 60bps and was changed effective 31 December 2020 to a flat fee of 75bps. Net-of-fee performance was restated retroactively. In December 2023, the composite benchmark was amended from the MSCI AC Asia ex Japan Gross Return Index (USD) to the MSCI AC Asia ex Japan Net Return Index (USD). The change was effective retroactively from 01 January 2001, when MSCI launched the Net Return version of the index.

In pursuit of this objective the funds may take significant active positions relative to a recognised Asia Pacific equity index.
3. The composite returns are benchmarked to the MSCI AC Pacific Gross Return Index (USD) from inception to 31 December 2000, the MSCI AC Pacific Net Return Index (USD) from 01 January 2001 to 01 July 2020 and the MSCI AC Asia Pacific Net Return Index (USD) thereafter. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. Investments made by the Firm for the portfolios it manages according to respective strategies may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark. Accordingly, investment results and volatility will differ from those of the benchmark.
4. Effective January 2023 the minimum asset level has been removed from the composite. Prior to this date it was USD 5 million.
5. Gross-of-fee performance results are presented before management and custodial fees but after all trading commissions and withholding taxes on dividends, interest and capital gains, when applicable. Net-of-fee performance results are calculated by subtracting the highest fee of an active portfolio within the composite from the monthly gross-of-fee returns. The highest management fee of a portfolio included in the composite is 96bps. The institutional management fee schedule is as follows: Assets up to 100 mln GBP 60bps, Next 150 mln GBP 55bps, Next 250 mln GBP 50bps. (Or equivalent local currency).

Asia Pacific Equity Composite

Schedule of investment performance (3)

6. Composite dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for the full year. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented where there is less than 36 months or fewer than three portfolios in the composite. All risk measures are calculated using gross of fee returns. The Firm consistently values all portfolios each month on a trade date basis. Accrual accounting is used for all interest and dividend income. Past performance is not an indication of future results. Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations is available upon request.
7. Valuations and portfolio total returns are computed and stated in U.S. Dollars. The Firm consistently values all portfolios each day on a trade date basis. Portfolio level returns are calculated as time-weighted total returns on daily basis. Accrual accounting is used for all interest and dividend income. Past performance is not an indication of future results. Foreign currency exchange rates for calculation of the composite and benchmark are based on the WM/Reuters Closing Spot Rates TM that are fixed at approximately 4:00 p.m. London time.
8. The composite creation date is May 2002.
9. The following are available on request: * Policies for valuing investments, calculating performance and preparing GIPS reports * List of composite descriptions * List of limited distribution pooled fund descriptions * List of broad distribution pooled funds
10. Net-of-fee performance was calculated using a flat fee of 60bps and was changed effective 31 December 2020 to a flat fee of 96bps. Net-of-fee performance was restated retroactively. In December 2023, the composite benchmark was amended from the MSCI AC Pacific Gross Return Index (USD) to the MSCI AC Pacific Net Return Index (USD). The change was effective retroactively from 01 January 2001, when MSCI launched the Net Return version of the index.
11. In August 2024, the composite benchmark was amended from the MSCI AC Pacific Net Return Index (USD) to the MSCI AC Asia Pacific Net Return Index (USD). The change was effective retroactively from 02 July 2020, to reflect the sole remaining member's corresponding change.

Emerging Markets Equity Composite

Schedule of investment performance (2)

Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods 1st January 2003 through 31st December 2023. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. For purposes of compliance with Global Investment Performance Standards (GIPS®), "Invesco Worldwide" refers collectively to all direct or indirect subsidiaries of Invesco Ltd. that provide discretionary investment advice with the exception of the following entities: Invesco Investment Management Ltd., Invesco Investment Advisers LLC, Invesco Asset Management Australia (Holdings) Ltd., Invesco Global Real Estate Asia Pacific, Inc., IRE (Cayman) Ltd., Invesco Senior Secured Management, Inc., Invesco Private Capital, Inc., and Invesco Capital Management LLC. Invesco Great Wall Fund Management Company Limited is compliant with GIPS but is not part of Invesco Worldwide.
2. The Invesco Emerging Markets Equity composite includes all the discretionary, fee paying portfolios which invest in the equity shares of companies in emerging market countries. Generally, this would be the countries included in the MSCI Emerging Markets Index, although we maintain the freedom to invest in emerging markets outside this list. This composite includes a retail fund which is subject to UCITS III investment guidelines. Portfolios may invest in derivative instruments, including credit default swaps (as both a protection buyer and seller), but only for efficient portfolio management purposes.
3. The composite returns are benchmarked to the MSCI Emerging Markets Gross Return Index (USD) from inception to 31 December 2000 and the MSCI Emerging Markets Net Return Index (USD) thereafter. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. Investments made by the Firm for the portfolios it manages according to respective strategies may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark. Accordingly, investment results and volatility will differ from those of the benchmark.
4. Effective January 2023 the minimum asset level has been removed from the composite. Prior to this date it was USD 5 million.
5. Gross-of-fee performance results are presented before management and custodial fees but after all trading commissions and withholding taxes on dividends, interest and capital gains, when applicable. Net-of-fee performance results are calculated by subtracting the highest fee of an active portfolio within the composite from the monthly gross-of-fee returns. The highest management fee of a portfolio included in the composite is 100bps. The institutional management fee schedule is as follows: 60 basis points on the first \$100 million, 50 basis points on the next \$150 million, 40 basis points on the next \$250 million.
