This marketing communication is for Professional investors in Continental European countries as defined in the important information section, and Dubai. Investors should read the legal documents prior to investing. This document may also be used by financial intermediaries in the United States as defined in the important information section.

#### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund.

#### **Fund Strategy**

The fund aims to achieve long-term capital appreciation by investing primarily in equity securities of Asian companies whose business is likely to benefit from growth in domestic consumption in Asian economies. We believe there are ample investment opportunities to be found by tapping into the megatrends within the consumer space, such as Digitalization, Wellness, Premiumization (the shift towards more expensive premium products), New Experience and Urbanization. The team makes use of a bottom-up, selective approach to invest in companies that display sustainable leadership and competitive advantages, while trading at a discount to our view of fair value. Environmental, Social and Governance (ESG) considerations are fully integrated in the investment process.
